

GLOVE GUARD LP

MANUFACTURING INNOVATIVE DESIGNS
WITH SAFETY IN MIND

1. Use of Glove Guard LP Products reduces direct and indirect costs associated with hand injuries. If personal protective equipment is available, it will be utilized.

“Use of the Glove Guard® clip has enabled us to far surpass our initial expectations. It has become as common as hard hats and safety glasses. Recordable hand injuries have been reduced as much as 86%. Thanks for your continued support and assistance in making our site safer and more cost efficient.”

— Polymers Group, Mont Blevieu Plant

2. Use of Glove Guard LP glove clip products reduces glove replacement cost and the costs associated with environmental cleanup. The redundant breakaway also provides a level of reduced liability.

In the Houston, Texas area, several general contractors on major building sites require Glove Guard LP products for all contractors to reduce hand injuries and glove replacement costs. The strong grip of the product ensures that the items stay with the worker instead of just falling off, and the redundant breakaway reduces the possibility of attached items pulling an employee into machinery.

“In the last 3 months, about 80% of the glove replacement cost is due to lost or misplaced gloves. Your product will help greatly reduce that number.”

— Darren Matthews

3. Use of Glove Guard LP products along with a company’s safety program incentive combines the dollars spent with tools that help accomplish the safety goals.

Major companies are using Glove Guard LP products as safety incentives with their logo, safety program slogan, or one of our 9 Standard Safety Slogans to get their safety message across while providing a tool to accomplish their safety goal and reduce glove replacement costs.
